Reg. No. : 30161487	Reporting Date : 15-10-2016 05:46PM	Ref. Doctor : Dr. --

## Histopathology Report

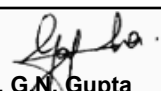

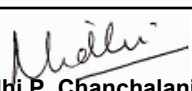

**Specimen :** UTERINE CURETTINGS

**Gross :** The specimen comprises of several grey brown soft tissue pieces together measuring 2x2x1.5 cm. Representative pieces are taken for embedding

**Microscopic :** The biopsy shows hydropically dilated villi along with normal chorionic villi. Most of dilated villi have irregular scalloped outline and vessels are seen within them. Mild to moderate throphoblastic proliferation is seen. Histomorphology is suggestive of partial vesicular mole.

**Impression :** Suggestive of partial mole.  
Kindly correlate with sonographic findings
